

# Setting Up a KidBlog Account on the App

- Open the app.
- Tap on **Settings** at bottom of page.
- Choose **Login to Kidblog** (because you already have a class)

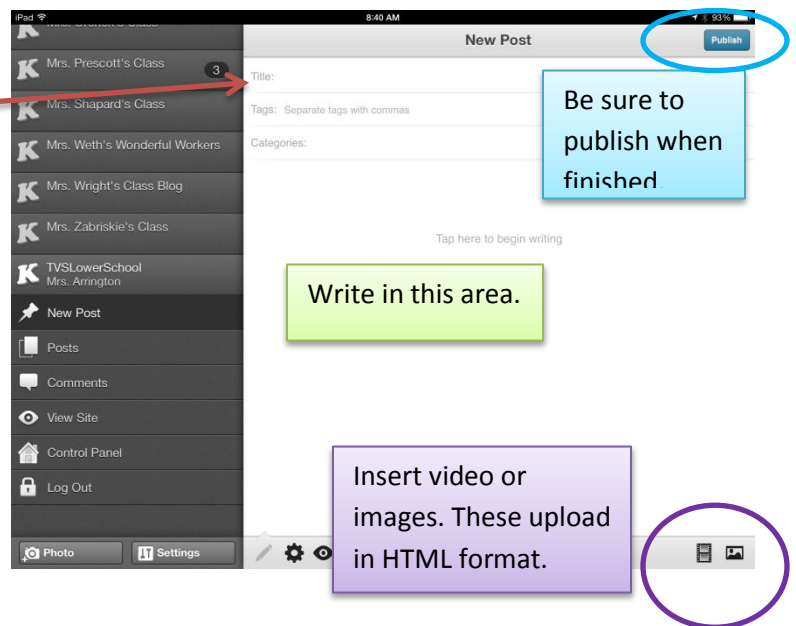

- Add the end of your class KidBlog URL.
- We will add **TVSSocialMediaChallenge2015-2/**

- Once the URL has been typed, a list of class members shows up at the bottom of the page.
- Tap on your name.
- Then type in your password.

- Once logged in, the user can write the blog.
- A title should be typed first.
- Tags are optional. (*A tag is like a main idea and helps visitors see, at a quick glance, what topics have been written.*)
- Categories are optional – I haven't set up any of the blogs to use them.
- Images or video from the iPad's camera roll (photos) can be added to the blog.

- Help students get into the habit of logging out of their blog.
